Preface ii

1. Installation Procedures for WEBBr 1

Preface

The following conventions are used in this document:

Bold	Used for information that is typed, pressed, or selected in executables and instructions. For example, select connect to host .
<i>Italics</i>	Used for file names, directories, scripts, commands, user IDs, document names, and Bibliography references; and any unusual computerese the first time it is used in text.
<u>Underline</u>	Used for emphasis.
Arrows <>	Used to identify keys on the keyboard. For example <Return>.
“Quotation Marks”	Used to identify informal, computer-generated queries and reports, or coined names; and to clarify a term when it appears for the first time. For example “Data-Generation Report.”
Courier Font	Used to denote anything as it appears on the screen or command lines. For example <code>tar xvf dev/rmt/3mm</code>
Capitalization	Used to identify keys, screen icons, screen buttons, field, and menu names.

1. Installation Procedures for WEBBr

The installer is prompted for two items of information during installation. The first is a “default home URL.” If the PostInstall program is able to locate the *www.domain.name* in DNS (where *domain.name* is the name of the domain in which the installation is to occur) the installer is given that name as an option. Enter the fully-qualified name of the machine hosting the local web server (if one exists). Note that there will be no loss of functionality if nothing is entered here.

The second item of information is the “organization name.” This is used for news postings to help identify the author of a news article. The organization name can be up to 64 characters and is used to specify the organization whose members will be using the WEBBr segment.
